My name is John Kent Thompson and I have been subjected t one of the most atrocious misuse of technology and waste of funding ever to befall a person in what is termed locally here as the game.
It is not a game. Women and elderly persons don't die due to negligence...
Or are left alone in their golden years...
in the hands of strangers who steal family heirlooms...
and deplete the savings of unsuspecting families...
For a game.
But I guess there's a few cities out there here on the West Coast that have forgotten such rudimentary conditions in humanity.
They purport to be everything from the CIA, who's acronym could mean several different things.
It's surmised that the Church of Jesus Christ of latter-day saints is involved.
And of course, study would suggest that the blanket surveillance coverage of United States citizens by the NSA, working in conjunction with the FBI, are at the center of it.
Truth be told, it seems to me that it's a melange of all three who drive this despicable program forward. Unsuspecting citizens, often the retired and elderly, and church going communities are the pawns doing the footwork in the guise of neighborhood watch and TIP programs. It's also ironic, that here in Fresno county, and interlinked throughout the state, there is a network of drug running, prostitution, money laundering, unemployment fraud, and identity theft that appear to line the pockets of those at the top of the game.
